The **Reference list** includes the full publication information for the sources referenced in your in-text citation. It is single-spaced with a blank line between entries in alphabetical order. Use **hanging indents**. For **more than one author**, include them all up to 10 in the order they appear. Use n.d. if **no publication date** is provided. Precede issue numbers with “no.” For **online sources**, add the DOI, URL, or Library Database name.

**In-text citations** are parenthetical with author, date, and relevant page numbers (Turabian 2018, 143). Place them at the end of the sentence, before the period. For **3+ authors**, name the first followed by et al. When there is **no author**, use the title formatted as in the Reference list. If there is **no date**, use n.d.
